ABOUT THE COMPANY

BankSouth Mortgage

BankSouth Mortgage is a wholly-owned subsidiary of BankSouth, a leading community bank headquartered at Lake Oconee in Greensboro, Georgia. Recognized as a top-performing bank in the country with over $1.3 billion in assets, BankSouth has built a strong reputation for personalized service and local expertise.

BankSouth Mortgage originates over $2 billion annually in home loans through its team of approximately 60 loan officers, serving customers across the Southeast and throughout the United States. The mortgage division leverages nCino as its point-of-sale platform—where roughly 85% of applications originate—and Encompass as its loan origination system.

The $400K verification problem.

Before partnering with Truv, BankSouth Mortgage was spending approximately $400,000 annually on income and employment verifications through multiple traditional providers. Individual loan verification costs were reaching $200+ per file on 40% of loans, with some files totaling as much as $758—creating significant cost pressure on the business.

BankSouth Mortgage sought a single, comprehensive verification partner that could integrate directly into both nCino and Encompass—delivering immediate cost savings while improving reporting, simplifying vendor management, and enhancing the borrower experience across its nationwide lending operation.

WHY TRUV

The Truv Platform

BankSouth Mortgage selected Truv for its unmatched coverage, cost efficiency, and ability to embed directly into existing nCino and Encompass workflows—replacing costly multi-vendor verification processes with consumer-permissioned data from the source.

THE CHALLENGE

$400K Annual Verification Spend & Multi-Vendor Complexity

As a high-volume community lender originating over $2 billion annually, BankSouth Mortgage was spending approximately $400,000 per year on verifications through multiple legacy providers. Beyond cost, the team faced operational complexity from managing separate vendors for income, employment, and asset verifications—alongside limited reporting capabilities. BankSouth needed a single partner that could deliver cost efficiency, comprehensive coverage, and deep integration into their existing tech stack.

Escalating verification costs

Individual loan verification costs reaching $200+ per file on 40% of loans, with some files totaling as much as $758

Limited reporting and insights

Analytics capabilities from existing providers were limited, making it difficult to track performance and optimize verification workflows

Multi-vendor relationship management

Managing separate vendors for income, employment, and asset verifications created unnecessary operational complexity

Need for cost efficiency and comprehensive coverage

Required a single solution that could handle income, employment, and asset verifications while dramatically reducing per-file costs

Strong integration requirements

Needed seamless integration into both nCino (POS) and Encompass (LOS) without disrupting existing loan officer workflows

> Managing multiple verification vendors was creating operational complexity we did not need. Truv's ability to handle income, employment, and asset verifications through a single, intuitive platform has simplified our vendor relationships while reducing costs and improving performance.

Tom Masci

SVP Tech & Data Analytics, BankSouth Mortgage

THE SOLUTION

Consumer-Permissioned Verification in nCino & Encompass

Truv partnered closely with BankSouth Mortgage to embed consumer-permissioned verification directly within the two platforms that power their operations: nCino for borrower-facing verifications and Encompass for re-verifications and back-office workflows.

POINT OF SALE

nCino Integration

Truv powers borrower verifications upfront where approximately 85% of BankSouth Mortgage's applications originate. Loan officers can request and complete income, employment, and asset verifications without leaving their core nCino workflow. Borrowers receive a seamless experience that guides them through account-linking with clear messaging and minimal friction.

LOAN ORIGINATION

Encompass Integration

Truv replaced BankSouth Mortgage's manual re-verification process with on-demand refresh reports directly within Encompass. This eliminates the need for processors to manually chase down re-verification orders, freeing up valuable time and reducing delays as loans approach closing—all at no additional cost.

BEFORE		TRUV BRIDGE		RESULT
Manual VOIE via multiple vendors	→	Borrower links payroll/bank accounts	→	Instant verification in nCino & Encompass

Truv also delivered enhanced reporting capabilities through a real-time dashboard with performance metrics and analytics—giving BankSouth Mortgage the visibility they lacked with previous providers. Admin-level control over verification workflows enabled the team to customize processes to match their specific operational needs.

The implementation followed a thoughtful, phased approach. Truv worked with BankSouth Mortgage to pilot the solution in select branches first, allowing the team to refine their approach before the company-wide rollout. Internal training materials, branded one-page PDFs, and step-by-step guides ensured loan officers adapted quickly.

Verifications now complete in under 60 seconds—a dramatic improvement over the manual processes that previously slowed down loan processing timelines and frustrated both loan officers and borrowers.

> *"The implementation process was incredibly smooth. Truv worked with us to pilot the solution in select branches first, which allowed us to refine our approach before the company-wide rollout. Our loan officers adapted quickly because the integration fit seamlessly into their existing workflows."*
>
> — Tom Masci, SVP Tech & Data Analytics, BankSouth Mortgage

OUTCOMES

Key Results

Est. $100K+ in Annual Savings

BankSouth Mortgage dramatically reduced verification expenses compared to their prior ~$400K annual spend across multiple legacy providers.

82% VOIE Login Conversion Rate

Borrowers easily connect payroll accounts and complete income and employment verifications, driving a seamless experience measured from Encompass.

92% VOA Login Conversion Rate

Asset verification login conversion reaches 92% in Encompass when loan officers guide borrowers through the process, with 81% across all channels.

Rapid Implementation

BankSouth Mortgage achieved rapid deployment across both nCino and Encompass, piloting in select branches before a smooth company-wide rollout.

BEFORE TRUV

COLLABORATIVE PARTNERSHIP

A True Partnership Beyond Technology

Truv's collaboration with BankSouth Mortgage goes beyond technology—it's a true partnership focused on success across every branch and channel.

Truv's product and customer success team worked closely with BankSouth Mortgage to:

- Powerful Dashboard Analytics — real-time visibility into verification performance with a customizable dashboard
- Streamlined Integration Architecture — turnkey integration into nCino and Encompass with intuitive setup
- Unparalleled Support — willingness to iterate, troubleshoot, and respond quickly to any issue
- Collaborative Partnership — ongoing implementation, customization, and optimization across the organization

This collaborative approach created lasting trust and measurable ROI across BankSouth Mortgage's verification ecosystem.

CONCLUSION

> The cost savings alone would have justified our decision to partner with Truv, but we have gained so much more - better analytics, faster turnaround times, improved borrower satisfaction, and a support team that is genuinely invested in our success. The total value far exceeds what we expected.

KN **Kim Nelson**
CEO, BankSouth Mortgage

Through its partnership with Truv, BankSouth Mortgage has transformed how it manages verifications—achieving an estimated **$100,000+ in annual cost savings**, **industry-leading conversion rates**, and **streamlined operations** across both nCino and Encompass.

This collaboration showcases what's possible when a community lender and a technology innovator align around shared goals: **efficiency, transparency, and borrower-first lending**. With a real-time analytics dashboard, single-platform verification, and a support team that operates as a true extension of the BankSouth team, Truv has set a new standard for what verification partnership looks like.
