Campaign Launcher

From Audience to Inbox in One Conversation

Tell the AI who you want to reach and what you want to say. It handles the rest — finding contacts, building the email, and setting up the send — with your approval at every step.

Live Walkthrough

Feb 2026

THE PROBLEM

Launching a campaign takes 5+ tools and hours of manual work

Find the audience

Search HubSpot, apply filters, export contacts, clean the list...

Build the email

Design HTML, match brand guidelines, upload to SendGrid...

Wire the systems

Connect Knock workflow, set up webhook, configure pacing...

Campaign Launcher does all of this in a single conversation. You describe the audience and the email. It orchestrates HubSpot, Knock, and SendGrid — and asks for your OK before each step.

HOW IT WORKS

6 steps, each with a checkpoint

Nothing happens without your confirmation. You stay in control at every stage.

Find People
Search HubSpot for your target audience

→

Save List
Create a contact list in HubSpot

→

Sync to Knock
Push contacts to our email platform

→

Design Email
Build a branded template in SendGrid

→

Connect
Wire the email to the audience

→

Send
Deliver in safe batches

STEP 1 — FIND PEOPLE

Describe your audience in plain English

We said: *"Find everyone who filled out the Lead Magnet Form, but exclude customers, government, and anyone who opted out."*

139	93
Form submissions found in HubSpot	After removing customers, gov sector & opt-outs

The AI shows you who's on the list and asks: **"Want to proceed?"**

STEP 1 — PREVIEW

You see who's on the list before anything happens

BE	**Bill Egan** bill@billegan.com	12 CLICKS	47 OPENS
GR	**Gary Royal** gary.royal@migonline.com • MIG	8 CLICKS	32 OPENS
DB	**Derek Bartley** derek.bartley@xactus.com • Xactus	7 CLICKS	28 OPENS
JA	**Jennifer Amenell** jennifer.amenell@nflp.com • NFLP	6 CLICKS	22 OPENS
AW	**Alan Wackman** awackman@catalystmtg.com • Catalyst Mortgage	5 CLICKS	19 OPENS

✓ Approved — proceed to save list

STEPS 2 & 3 — SAVE & SYNC

Contacts saved to HubSpot, then synced to our email platform

Two steps happen back-to-back with your approval. A permanent list is created in HubSpot, then those contacts are pushed to Knock (our email delivery system) so they're ready to receive the campaign.

📋 **HubSpot List**
93 contacts saved

→

📥 **Knock Audience**
93 members synced

→

✅ **Ready for Email**
Audience locked in

🔒 The **HubSpot list is permanent** — you can reference it later for reporting or re-use

📧 Contacts are **identified by email address** in Knock, so they stay consistent across campaigns

STEP 4 — DESIGN THE EMAIL

A branded email, built and uploaded automatically

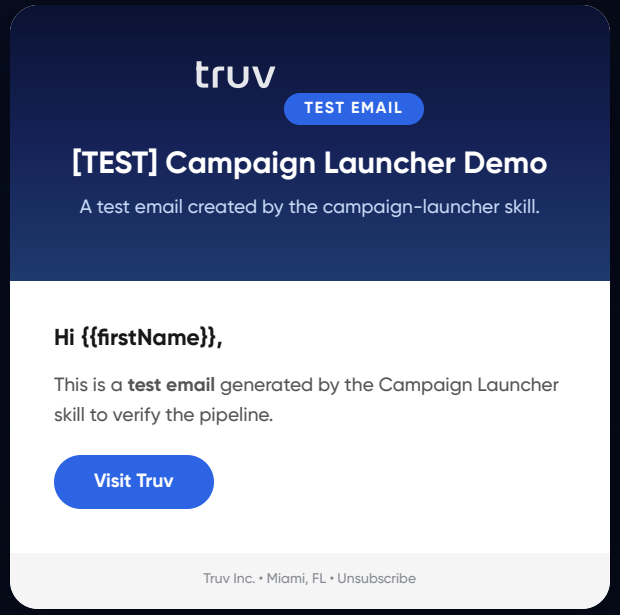
The AI builds a fully branded email using Truv's design system — correct fonts, colors, logo, mobile-responsive layout, unsubscribe link, and footer. It then uploads it to SendGrid as a ready-to-use template.

🎨 **On-brand** — Gilroy font, Truv blue, dark hero gradient

📱 **Mobile-ready** — responsive on every device

👤 **Personalized** — greets each recipient by first name

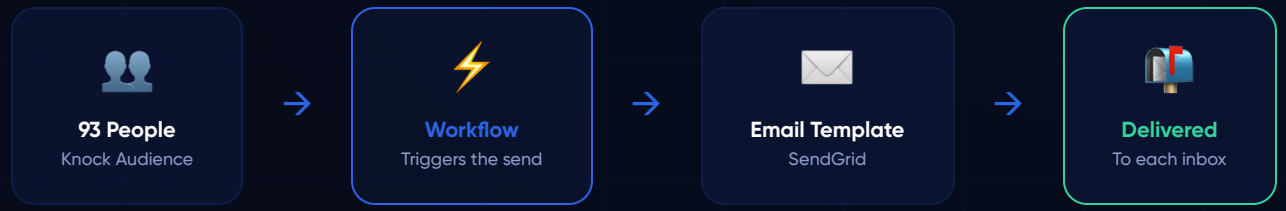
✅ **Compliant** — unsubscribe link included automatically



STEP 5 — CONNECT THE PIECES

The email template is wired to the audience automatically

Behind the scenes, the AI creates a “workflow” in Knock that connects the SendGrid email template to the audience. Think of it as plugging in the last cord — the audience knows who to send to, and the workflow knows what to send.



🔐 **Validated** — the system confirms the workflow is active and correctly configured

🚫 **Unsubscribe compliance** — built into every workflow, no extra steps needed

STEP 6 — SAFE, STAGED SENDING

Emails go out in batches, not all at once

For large audiences, the system sends in controlled batches with pauses between them. This protects deliverability and prevents emails from landing in spam. You can always preview the plan before any emails go out.

93	1	< 1 min
Recipients ready	Batch needed (max 500 per batch)	Estimated delivery time

⚠ Dry Run For this demo, we previewed the plan without actually sending any emails.

ALL DONE

Campaign ready to fire

AUDIENCE	HUBSPOT LIST	EMAIL	DELIVERY
93 people	**Saved**	**Designed & uploaded**	**Ready to send**
Lead Magnet form fills, filtered	Permanent list for reporting	Branded, mobile-ready, compliant	Batched for safe delivery

What used to take hours now takes one conversation.

Just tell the AI your audience and your message. It builds everything, asks for your approval at each step, and delivers safely.
